

2hp Grinder Package

Sewage Grinder System Components

Fiberglass Pump Basin and Lid:

This chop-hoop filament wound fiberglass basin is the perfect housing for an onsite grinder system. Standard packages are 30" in diameter and 5 feet deep. For custom sized basins, please call for pricing and availability.

2hp Grinder Pump:

This rugged cast iron submersible grinder pump provides heads to 112 feet and capacities up to 42 gpm. For ease in maintenance, all packages include a discharge assembly with union for quick disconnect and a stainless steel lifting chain for ease in pump removal from basin.

SC2-ETM PRL Control Panel:

The SC2-ETM PRL control panel from Adenus Technologies provides excellent pump control for this 2hp grinder system. This panel can be wired for 2- or 3-float controls and features an audible alarm for high water situations and a visual green light to indicate pump run situations.

Float Switches and Accessories:

This grinder package includes all of the necessary components to truly make this a complete package. Some of the packaged components include: conduit fittings and grommets, a ball valve and check valve, discharge assembly, and an inlet sanitary tee (cleanout and sewer relief valve also available).
